Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in responsive to the amendment filed 01/06/2009.

Claims 1, 5-9, 22, 26-30, 43, 45, 47, 49-53, and 55-73 are pending in the application.

Claims 2-4, 10-21, 23-25, 31- 42, 44, 46, 48, and 54 have been cancelled. Claims 60-73 have been added.

In the Remarks filed 01/06/2009 Applicant states “[T]he PTO-892 form (Notice of References Cited) at the end of the Office Action omits the Koning reference (US Patent No. 6,998,226), which was applied in a rejection of Claims 15-18, 21, 33-34, 36-39, 42, 52, and 58 (Office Action, Page 10, Section 4). Please furnish an updated PTO-892 form”. Koning reference (US Patent No. 6,998,226) was in PTO-892 form which was mailed with the Office Action on 03/23/2007.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 5-9, 22, 26-30, 47, 49-53, and 55-73 drawn to event notification, classified in class 719, subclass 318; and

- II. Claims 47 and 49 drawn to interprogram communication using shared memory, classified in class 719, subclass 312.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility because it can be used in systems where the information from the initial indication and the information from said one or more subsequent indications are coalesced into a coalesced notification and the coalesced notification is propagated to a receiving node, as opposed to Invention II, where concurrency control techniques are invoked to control concurrent access to a shared- memory event buffer from processes that propagate messages to subscriber nodes. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
